How to do CPR

Majority of sudden cardiac arrests occur out of hospitals. The success of the chain of survival - "Early Recognition and Access, Early CPR, Early Defibrillation & Advance Cardiac Life Support" depends on the appropriate action taken by the rescuer.

Watch the video below for a how-to-guide to CPR & AED, in accordance with the National Resuscitation Council's guidelines.

NOTE: This is not a substitute for completing the CPR+AED Certification course.
